Claims 27-32 are objected to because of the following informalities:

“hydrolysable” is misspelled. Appropriate correction is required.

Applicant's election with traverse of claims 27-37 in the reply filed on June 12, 2009 is acknowledged. The traversal is on the ground(s) that the search of Group I should overlap that for Group II. This is not found persuasive because the search in class 428 for Group II is not required for the process claims of Group I.

The requirement is still deemed proper and is therefore made FINAL.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 27-37 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 27, “the resultant” lack(s) proper antecedent basis in the claim(s). It is suggested that it be deleted.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1793

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 27-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Livage et al., in view of Nass '781.

Livage teaches the instantly claimed process of hydrolysis and condensation of a hydrolysable lipophilic group containing compound in water but may differ in that the removal of liquid to form a powder is not stated. See pp. 259,286-289, Fig. 16.

Nass teaches a similar process as Livage and teaches the removal of liquid in order to obtain a ceramic powder. See claim 1.

Art Unit: 1793

It would have been obvious to one skilled in the art to remove liquid from the product of Livage as taught by Nass in order to obtain the more valuable nanoscale ceramic powder.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
